

About Shea

What do you get with the right mix of old-fashioned family values, unmatched customer service and first-rate products? Shea Concrete Products, an innovative, forward thinking company with a reputation for providing premium quality precast concrete products to the New England market. Founded in 1949 by Ernie Shea, our company's auspicious beginnings began when building foundations were still made with concrete blocks. With his wife Mary and son Ed by his side, Ernie quickly became known for being an honest, easy-going businessman who was good to his customers and employees and fair with his competition.

Today, Shea Concrete Products remains a family business in every sense of the word: Ed, his wife Judi, their four daughters, three sons-in-law and two grandchildren, plus over 50 dedicated and knowledgeable employees all help to run the company.

STAIRS & STEPS

NEW ENGLAND'S
PREMIER PRECASTER

Where Form & Function Meet Performance

From banking to bulkhead, Shea's full line of precast steps can meet any functional and aesthetic need. Unlike concrete steps manufactured on site, our precast steps have ease of installation, delivered complete with no forms to build and no waiting. Designed to withstand the most aggressive environments, our steps are made of high quality materials and Engineered under strict ASTM guidelines. These stairs are manufactured to specifications using steel forms and offer superior strength and longevity.

For over 50 years, Shea Concrete Products has been elevating the front entrance of New England homes with steps that make a statement. We offer the largest selection of styles, finishes, widths and configurations. To complete the look, wrought iron hand railings are available for immediate installation. Let Shea's Quality Workmanship enhance the appearance and value of your home with precast concrete steps.

Available Steps

- Plain Concrete
- Stone & Granite
